

Paris, 20 February 2019

ENTPE and Keolis renew their partnership with the signing of a new agreement

On 13 February 2019, Bruno Danet, Group Executive Director Human Resources and Organisation at Keolis, and Jean-Baptiste Lesort, Director of ENTPE (a French engineering school for public works in Lyon), signed a new three-year partnership agreement.

This partnership agreement follows the one signed in 2014 that has already seen the introduction of a rich and diverse programme of initiatives. The new agreement is intended to further facilitate the recruitment of engineers and highly qualified employees by Keolis, and to support students as they enter the job market.

Thanks to the involvement of many operational and Human Resources (HR) employees from Keolis, this partnership will see the organisation of meetings, visits, HR events (interview simulations, recruitment days) and learning sessions. These events will be targeted at undergraduate engineering students, master's degree students from the urban and regional passenger transport stream, as well as PhD candidates and researchers from the 'Transport and mobility' department of ENTPE.

The new agreement outlines all the learning, employer brand and recruitment initiatives Keolis will lead over the next three years as part of the different courses offered by ENTPE. Students undertaking ongoing vocational training and research activities will also be able to benefit from the initiatives under this agreement.

ENTPE and Keolis were also keen to ensure this partnership was established at different levels of their respective organisations, and therefore for the rollout of programme initiatives, resources have been mobilised not only from Keolis head office but also from its subsidiary in Lyon, which operates the city's public transport network.

The ceremony for the signing of the new partnership was followed by a presentation from Bruno Danet and Paul Chaperon, Commercial and Marketing Director from Keolis Lyon, on Keolis' strategy and its development in the mobility market and across a range of different business areas. The presentation concluded with a discussion time with students.

About ENTPE

One of France's national engineering academies that reports to the Ministry of Solidarity and Environmental Transition, ENTPE offers engineering courses and complementary programmes (master's and specialised master's degrees, PhDs) in all fields of sustainable urban development including building construction, public works, civil engineering, transport and mobility, environment, urbanism, urban policy making, risk management.

Located in Vaulx-en-Velin, the school is a member of several competitiveness centres and economic clusters, as well as two laboratories of excellence.

For more information, visit www.entpe.fr and follow the school on www.facebook.com/EntpeLyon and twitter.com/entpe

About Keolis

Leading the way in public transport, Keolis partners with public decision makers to make shared mobility an asset for cities and their communities. Internationally recognised as the leading operator of trams and automated metros, Keolis adopts a determined innovation approach with all its partners and subsidiaries (Kisio, LeCab, EFFIA, Keolis Santé and Cykleo) to develop new forms of shared and customised mobility, and reinforce its core business across a range of transport modes including trains, buses, cars, trolleybuses, shared private hire vehicles, river shuttles, ferries, cycles, car sharing services, electric autonomous vehicles and urban cable cars. In France, Keolis is now the leader in medical transport services through the creation of Keolis Santé in July 2017 and positioned as the number two car park operator, through its subsidiary EFFIA.

The company is 70% owned by SNCF and 30% by the Caisse de dépôt et placement du Québec (CDPQ). Keolis employs 63,000 people in 16 countries and recorded a turnover of 5.4 billion euros in 2017. Today,

over 3 billion passengers worldwide have used one of the shared mobility services offered by Keolis.
